PROFESSIONAL SUMMARY

Software Developer with experience in Adobe Experience Manager (AEM) Sites, content management systems, and scalable web component development. Skilled in AEM component development, editable templates, Sling Models, and ClientLibs, plus front-end technologies including HTML5, CSS3, JavaScript, React.js, and Next.js. Experienced in performance optimization, REST API integration, Agile practices, and documentation for team knowledge sharing.

TECHNICAL SKILLS

Adobe Experience Manager: AEM Sites, AEM as a Cloud Service (Authoring), AEM Component Development, AEM Editable Templates, Sling Models, Client Libraries (ClientLibs), Content Fragments, Experience Fragments, AEM Assets (DAM)

Front-End: JavaScript (ES6), HTML5, CSS3, SASS, React.js, Next.js, React Native

CMS and Backend Integration: WordPress, Custom Post Types, ACF, REST API Development, Stripe Payment Integration

Tools and Practices: Git, Jira, Confluence, Agile/Scrum, Gulp, Performance Optimization (LCP)

PROFESSIONAL EXPERIENCE

WordPress Front End Developer | inGnius Systems Private Limited | Jan 2026 – Present

- Architected a custom WordPress theme for a luxury yacht charter and sales website using reusable PHP partials, SCSS components, and a Gulp-based asset pipeline (ES6 modules, Sass, minification)
- Designed scalable content models with Custom Post Types, taxonomies, and ACF field groups, letting editors manage listings, galleries, and marketing sections without developer intervention
- Developed WordPress REST API endpoints for charter search, yacht catalogs, filters, and locations, powering dynamic listing UIs with pagination, skeleton loaders, and client-side filtering
- Built custom rewrite routing for SEO-friendly detail URLs mapped to dedicated page templates
- Delivered reusable section components (hero, FAQs, partner brands, contact CTAs) for consistent layouts and faster content rollout

Webmaster / Web Developer (AEM Sites) | WHG Customer Services Philippines Inc. | Aug 2023 – Dec 2025

- Contributed to migrating flagship websites from a legacy CMS to Adobe Experience Manager (AEM) Sites, improving productivity across DevOps processes
- Developed and maintained AEM components, editable templates, Sling Models, and ClientLibs for scalable, reusable site components
- Improved the homepage Largest Contentful Paint (LCP) score, significantly reducing page load times
- Built a React.js promotional page that improved user engagement on the website
- Authored Confluence documentation so future developers could understand and maintain the codebase
- Used Jira and Agile practices for task management and iterative delivery

Web and Mobile App Developer | Stratus Health Solutions, LLC | Feb 2023 – Jul 2023

- Developed a cross-platform React Native application (Android and iOS) connected to an admin dashboard
- Integrated Stripe payments in Next.js and React Native
- Built a Next.js website with admin controls and provided ongoing support for the web and mobile applications

Web Developer and 3D Modeler | Engineering Services Fluid Mechanics and Thermodynamics | May 2021 – Dec 2022

- Built and maintained the website for Vactrans LLC
- Created a 3D animation of a train model used in investor presentations
- Provided technical support as a virtual assistant

EDUCATION

Bachelor of Science in Information Technology | ICCT Colleges Foundation Inc. | Dec 2022 | GWA 1.50
